Paula,

Please review the attached trip report for Mesker Door. The track changes are still on in the report if you want to make changes here. Please, if you could review and have comments back to me before Monday, May 1st.

Thank you ☺

Subject: Mesker Door Trip Report

Brent,

Please review the attached trip report for Mesker Door (last one with EPA). I've asked for Safety Data Sheets for all of the paints used at the facility and all of them are not listing a flashpoint and are saying non-hazardous, but there was enough paint waste there to not make them be a CESQG as they've notified as. Plus, it is being shipped by a hazardous waste transporter to a TSDF.

I think enforcement should be a Warning Letter and include the violation for having an actual hazardous waste determination conducted. The other issues are used oil and universal waste.

Thank you,

Bailee Dykes
